CompTIA Security+ (Preparing for the exam)

PROJECTS

Created a Secure Operations Center (SOC) and HoneyNet using Microsoft Azure

5/19/2023 - Present

Link to project: <https://github.com/mchronicle/cybersecurity>

Platform/Technology: Azure Virtual Machines, Microsoft Sentinel (SIEM), & Log Analytics

Summary: Deployed two VMs (Windows & Linux), implemented Microsoft Sentinel, a Virtual Network, Firewall, Network Security Groups, Active Directory, Private Endpoints, Log Analytics workspace, KQL queries, MSSQL Server Management Studio, Blob Storage, Key Vault, in addition to NIST 800-61, NIST 800-53, HIPAA/HITRUST, PCI DSS to ensure Azure Regulatory Compliance once I hardened the system. This resulted in a 50% reduction in Security Events (the remaining security events are system updates), 96% reduction of Syslog alerts, 100% reduction of SecurityAlert, 100% reduction of SecurityIncident alerts, and 100% of reduction from NSG Inbound Malicious Flows Allowed. See my GitHub for more.

EXPERIENCE

Company: The Constant Company, LLC/Vultr/GameServers.com/Choopa, LLC

9/25/2017 - Present

Title: Senior Trust & Safety Investigator

Respond to international legal inquiries (subpoenas, search warrants, exigent requests, etc.). Train senior and junior employees, draft policies and procedures, collaborate with the development team to add new product features. Draft the Transparency Report. Enforce TOS, AUP, Anti-Spam, DMCA, and trademark policies. Communicate with subscribers regarding DDoS attacks, malware, phishing, port scanning, and NCMEC reporting, revenge porn, ATO (Account Takeover), and other abuse violations. Confirm abuse credibility and resolution by running DNS queries. Ensure compliance regarding GDPR, CCPA, and other privacy laws by processing Right to be Forgotten requests, and DPAs. Update the embargoed and sanctioned countries list via OFAC.
